# Public Services

HOUSING\_URBAN DEVELOPMENT\_ENVIRONMENT\_

As Socialists we are completely convinced that the contribution of the Town Halls (local authorities) can make towards improving the citizen's quality of life is a fundamental element of municipal policy, consolidating a wide variety of basic services.

## PUBLIC SERVICES

While it is beyond doubt that the public services of our area have advanced under the Socialist Government we are not complacent.

Progress in the quality and efficacy of the services for citizens is another one of our goals.

- We will complete the improvements work at the cemetery
- We will continue to improve the installations in public squares and gardens
- We will increase the awareness training of the security services to improve their assistance for our residents
- We will design a Traffic Plan
- We will carry out a study of pedestrian areas and the policing of them with the collaboration of the different social sectors
- We will work towards the construction of an Integral Security Centre

## HOUSING

The Town Hall has an important role to play in the area of Housing: from access to "protected" housing to the restoration and acquisition of properties to rehouse the population.

In Socialist policies the emphasis is on the citizen's right to access housing.

For this reason we want to:

- Manage the building of houses to rent with a right to buy
- Continue to build houses of "official protection" as long as there is demand
- Develop the restoration of the old town and extend it to other areas of the town
- Manage the processing of grants for the rehabilitation, renting and purchase of houses
- Make land available for cooperative building projects

## URBAN DEVELOPMENT

The objective of the Socialist Town Halls (local authorities) is for the sustainable development of municipal areas with special attention that the urban development is in the interests of the citizens and not private interests, promoting coherent planning and optimising the use of energy resources

- We will develop units awaiting completion
- We will complete the General Plan of Urban Ordinance
- We will reserve new municipal developments for the construction of houses of "official protection."

- We will create a platform to study possible modifications to the General Municipal Ordinance Plan before it comes into effect
- We will study the possibility of building small houses of 40m2 on traditional country vegetable plots except in protected areas
- We will complete the Accessibility Plan

## ENVIRONMENT

The care of the environment and sustainable development are presented as vital elements of Socialist policy with a singular posture specific to all environmental aspects of our town, without forgetting that the environment by default is a new font of employment.

For these reasons we want:

- To complete the integral regeneration of the River Argos
- Promote the cultivation of agro-energy crops (biomass)
- Publish a Guide of Natural Resources of Calasparra
- Promote the use of recyclable bags
- Manage the forestry, fish farming and energy resources
- Recover bird observatories (Reservoir Quípar, Lomas,...).
- Complete the Plan of Underground Rubbish Disposal Containers
